**DETAILED ACTION**

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Solayappan et al., 6,781,184, in view of Yang, 5,825,068.

Solayappan et al. teaches in figure 2 a ferroelectric capacitor above a semiconductor body, with hydrogen barrier 88 over and in contact with a side of the capacitor. It would have been obvious to make the barrier 88 of amorphous silicon, in order to obtain the dangling bonds for trapping hydrogen, as taught at Yang column 2, lines 20-25.

Claims 2-14 and 16-22 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 23-28 are allowed.
